## **DETAILED ACTION**

### **Claim Rejections - 35 U.S.C. § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-44 are rejected under 35 U.S.C. 103 (a) as being unpatentable over U.S. Patent Nol. 6,027,254 to Yamada et al. in view of the remark.

Regarding to claims 20-44, Yamada discloses a method of making an optoelectronic device comprising providing a first substrate 1; forming at least one dielectric waveguide 31 in the first substrate 1; and etching at least portions of the layers or islands of semiconductor material initially grown on the substrate to define at least one active device 37, the at least one active device being physically bonded to the first substrate 1 and optically coupled to the at least one dielectric waveguide 31 in the first substrate 1 as set forth in col. 14, lines 4-55 and fig. 9.

Yamada does not disclose providing a second substrate having layers or islands of semiconductor material grown thereon; bonding an upper most layer of the second substrate onto an exposed surface of the first substrate.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to form multiple substrate layers of the same material.
